## INNOVA's Capabilities

Founded in 2008 and headquartered in Kansas City, INNOVA Consulting Group is an Economically Disadvantaged, Woman-Owned Small Business and Pega Alliance Partner. Through our Pega practice, BPM911.com, we are your solutions provider for training, implementation and all things Pega.

As a Microsoft Gold Certified, Tier 1 cloud solutions provider, we're experts at leveraging next generation, cloud-based IT solutions for government and commercial clients. By asking the right questions and listening, we're active partners capable of delivering successful solutions on time and on budget – minimizing risks and maximizing desired outcomes.

From Pega implementation to total IT strategy, our team of expert IT solutions strategists is ready to build your strategic IT roadmap customized to fit your needs and move your agency forward.

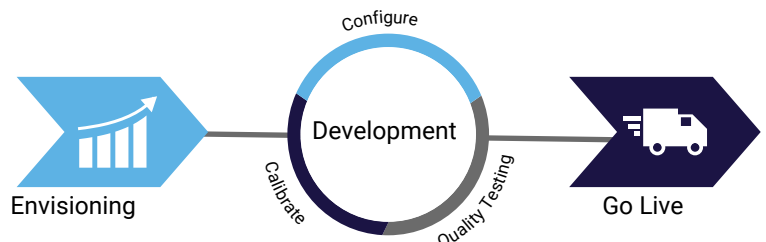

## Secret Clearance Background

INNOVA has active Secret level clearance from the DOD and is working toward obtaining Top Secret clearance.

Bridging the gap between the supply and demand of Pega Resources in the marketplace

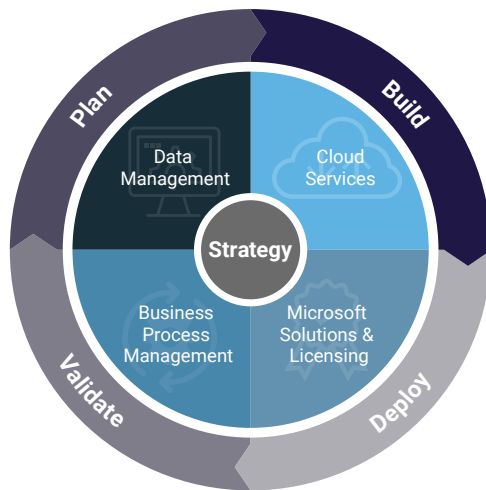

Our approach to developing and maintaining software systems relies on a combination of user-centric design (UCD) and modified Agile scrum methodology. BPM911's flexible, customizable three-phase process – envisioning, development, go live – promotes rapid delivery, reduces risk and ensures applications are usable and relevant for your end-users.

## INNOVA Consulting is your tech solutions partner for pulling your data, cloud and business process management needs into the most appropriate, simplified, efficient, overarching solution set for whatever challenges your organization faces.

- From enterprise to government clients, INNOVA has the tools and experience to handle your toughest IT roadblocks.
- Already working with Salesforce, Dynamics 365 ERP or CRM? We'll figure out how to optimize your existing IT environment without replacing your current software.
- Currently using Pega but need a team to accelerate your deployments? We've got you covered.
- Using Salesforce, Microsoft, COBOL – or a combination of tools? We'll architect the right solution for you, all within your existing ecosystem.
